Report on the working of the Special Hospitals in
Mysore, for the calendar year 1916.

Lunatic Asylum.

Rao Bahadur Rajakarya Pravina Dr.T.V.Arumugum Mudaliar, M.B.C.M., continued to be the Senior Surgeon in charge of the Asylum throughout the year, with Surgeon Mr. W.Srinivasa Iyengar, M.B.C.M., in sub charge, as Superintendent.

2. Statement No.I:- Shows the number of insanes treated during the year and their disposal.

The year opened with 141[✓] males and 74[✓] females, or, 215[✓] in all under treatment: there were 85 admissions, (62 males & 23 females) during the year including 2 re-admissions.

3. The total number of insanes treated during the year was 300 (203 males and 97 females), the - daily average number resident being 215.82, against 228.26 in the year 1915.

4. The number of persons discharged during the year was 78, against 100 in the previous year. Of these 36 were cured, 39, improved and 3 not improved, against 54, 40, 4 and 2 otherwise discharged respectively in the ~~xs~~ previous year. The percentage of cases discharged, as compared with the number of admissions was as follows:-

		1916.	1915.
Cured	...	<u>42.35 %</u>	39.42 %
Improved	...	<u>45.89 %</u>	29.20 %
		<u>Total. 88.24 %</u>	<u>68.62 %.</u>

5. The number of deaths during the year was 9 or 8.80 % of the average strength against 35, or 15.33 % in 1915.

6. The ^{duration} during of insanity of the patients - admitted during the year was ascertained in 46 cases. Of these 16 or 34.78 % are reported to have been ill for less than three months prior to their admission; 13 or 28.26 % between three and six months; 6 or, - 13.05 % between six and twelve; 11 or 23.91 % from 1 year to several years (8 between 1 and 2 years, 1 between 2 and 5 years, 1, 12 years, and 1, 20 years). In 39 cases the duration of illness was not ascertainable.

7. Of the 36 patients who were cured, the duration of mental disease prior to admission is recorded in 22 cases. In 10 cases it was less than three months: in 4 between 3 & 6 months: in 1 between 6 & 12 months: and in 7 more than a year. In the other 14 cases the duration of disease is stated to have been not ascertainable.

8. The average stay in the Asylum of the patients that were cured was 1 year 2 months and 17 days, the shortest being 1 month and 29 days and the longest 18 years, 2 months and 8 days.

9. Statement No. I A:- Shows the alleged pauses of insanity admitted for observation and their disposal. There were 8 at the commencement of the year under observation, and 89 were admitted during the year making a total of 97 (75 males & 22 females). Of these 69 were pronounced insane and admitted as such, 23 were handed over to their relatives under the orders of the Magistrates,

3.

2 were pronounced sane and discharged, and 1 died - leaving at the close of the year 2 under observation (1 male and 1 female).

22 10. Combining Statements I and I A:- There were in all ^x105 admissions into the Asylum during the year, against 147 in the year previous. The daily average strength was 226.24 against 236.12.

11. Of the 105 admissions during the year, 89 were examined and certified by the Superintendent of the Lunatic Asylum and the remaining ¹⁶15 by other - Medical Officers: Viz., 1 by the District Medical Officer, Mysore; 3 by the District Medical Officer, Kadur; 1 by the District Medical Officer, Kolar; 2 by the District Medical Officer, Chitaldroog; 2 by the District Medical Officer, Shimoga; 3 by the District Medical Officer, Tumkur; 3 by the Medical Officer, Mysore Jail; ^{and} 1 by the Medical Officer, Central Jail, Bangalore.

12. Statement No.II. This is the return of Criminals among the Asylum population. On 1st January 1916 there were 28 such patients (25 males and 3 females) and 6 were admitted during the year, making a total of 34 (31 males and 3 females). Their daily average strength was 28.65 (25.65 males and 3.00 females) against 28.92 (25.83 males and 3.09 females) in the year 1915.

There were four discharges and two deaths among them (4 males & 2 ~~females~~ females respectively) leaving 28 (25 males & 3 ~~females~~ females) at the close of the year.

13. Of the 6 admissions who were under trials one was charged under Section 309 I.P.C., one under

Section

Section 353 I.P.C., one under Section 435 I.P.C., one under Section 457 I.P.C., and two for murder.

Of the four who were discharged all were sent to stand their trial.

There were two deaths among the Criminals during the year under report.

14. The following is the classification of the Criminals remaining at the close of the year:-

Under-trial prisoners.	25.
Criminal lunatics tried and acquitted.	1.
Lunatic Criminals.	2.
Total.	28.

The offences with which they were charged are:-

Voluntarily causing hurt. (457 I.P.C)	2.
Lurking house-trespass (323 I.P.C)	1.
Culpable homicide not amounting to murder (304 I.P.C).	1.
Hurt with dangerous weapon.	1.
Murder (302 I.P.C).	7.
Offence under Section 81 Railway Act.	1.
Murder & culpable homicide not amounting to murder (302 & 304 I.P.C)	1.
Attempt to commit suicide (309 I.P.C).	2.
Theft in a dwelling house and lurking house trespass (380 & 457 I.P.C):	3.
Theft.	4.
Theft in a dwelling house & causing grievous hurt while committing lurking house-trespass (380 & 459 I.P.C).	1.
Mischief by fire.	1.
Culpable homicide not amounting to murder under Section 323 or 325 I.P.C.	1.

Voluntarily causing hurt by a dangerous weapon (324 I.P.C).	1.
Murder or culpable homicide not amounting to murder (302 or 304 I.P.C).	1.
Total.	28.

15. Statement No.III:- Shows sex, residence and religion of the admission during the year 1916. Of the 85 admissions 62 or 72.94 % were males and 23 or 27.06% were females.

17. 26 were residents of the C & M Station of Bangalore, 45 belonged to the Mysore State (Bangalore District contributing 19, Mysore 8, Kadur 3, Kolar 5, Hassan 2, Chitaldroog 2, Tumkur 4, and Shimoga 2). Out of the remaining 14, 6 were the residents of the British Territory and the residences of 8 are not known.

18. 63 ~~for~~ (44 males and 19 females) or 74.12 % of the admission were Hindus, 15 (13 males & 2 females) or 17.65 % were Mahomedans and 7 (5 males & 2 females) or 8.23 % were Christians.

19. Classified according to religion, of the 203 Lunatics that remained at the close of the year, 129, (85 males & ⁴⁴34 females) or 63.55 % were Hindus; 38 (14 males & 24 females) or 18.72 % were Mahomedans; 36 (29 males & 7 females) or 17.73 % were Christians.

The Hindus include 13 Brahmins (7 males and 6 females). The Christians include 27 Europeans and Eurasians (8 males & 19 females).

20. Statement IV:- Shows the occupation of the patients admitted during the year.

Of the 62 male admissions 8 had no occupation whatever, and the occupation of 7 was not known. 9 were agriculturists, 10 business-men, 13 were labourers, 7 Government servants, 4 pensioners, 1 palace servant, and 3 students.

21. Of the 23 female admissions three were looking after house-hold affairs, 1 was a coolie, 1 a cultivator, 10 had no occupation, whatever, and in the remaining 8 the occupation was not known.

22. Statement No.V: Shows the ages of patients admitted during the year.

As usual the largest number, viz., 57 or 67.06 % were between 20 & 40 years, 19 or 22.35 % were between 40 & 60 years, 7 or 8.23 % were under 20 years and 2 or 2.36 % were over 60 years.

23. Statement No.VI: Shows the distribution of lunatics in the Asylum during the year according to the types of insanity.

24. Of the patients that remained on 31st December 1915 there were under:-

I. <u>Errors of Development.</u>	Males.	Females.	Total.
Idiocy.	4	5	9
II. <u>Disorders of function:</u>			
Mania, all forms.	47	38	85
Malancolia, all forms.	15	11	26
Circular insanity.	1	1	2
Mental Stupor.	2	.	2
Delusional Insanity.	16	3	19.
Moral insanity.	3	2	5
Impulsive & obsessive Insanity.	3		3

III.

III. Results of infection:-

Toxic & Other general conditions:-

	Males.	females.	Total.
Post ^{febrile} febrile insanity.	1	..	1
Confusional Insanity.	1	..	1
Insanity of Haschisch.	15	..	15

IV. Degenerations:-

Epileptic insanity.	2	1	3
Other forms.	31	13	44.

Total.	141	74	215.
--------	-----	----	------

25. The admissions show the following types of insanity:-

I. Errors of development:-

	Males.	females.	Total.
Idiocy.	1	1	2

II. Disorders of function:-

Mania all forms.	31	13	44
Malencholia all forms.	11	5	16.

III Result of infection:-

(Toxic & Other general conditions)-

post- ^{febrile} febrile insanity.	3	1	4
alcoholic insanity.	5	2	7
insanity of Haschesia.	6	..	6
Insanity from other causes.	2	..	2

IV. Degenerations:-

^{Seuile} Epileptic.	2	..	2
other forms.	1	..	1

Total.	62	23	85.
--------	----	----	-----

26. Of the patients that were cured viz., 36,
(29 males and 7 females)

19 (12 males & 7 females) suffered from some forms
-of mania.

4 males.	do some forms of malen ~~ch~~ olia.
1 male.	do some forms of men- tal stupor.
2 males.	do post- ^{febrile} febrile in- sanity.
1 male.	do from confusional insanity.
2 males.	do from alcoholic in- sanity.
5 males.	do from insanity of Hasche ~~lesch~~ ^{isch}
1 male	do from insanity from other causes.
1 male.	do from epileptic in- sanity.

27. There were 19 deaths (15 males & 4 females)
during the year under report. Among them 8 males and 1
female were suffering from some forms of mania, 1 male
from malen~~ch~~olia, 1 male from delusional insanity, 1
male from post-^{febrile}febrile insanity, 1 female from alcoh-
olic insanity, 1 male from insanity of haschisch, 1 fe-
male from ^hsemile-insanity, 1 male from epileptic in-
sanity and 2 males and 1 female from Dementia.

28. Statement No. VII: ^{Among} ~~out of~~ the 85 ^scases admit-
ted no cause either pre-disposing ^{or} exciting was ascer-
tainable in 37 cases (24 males and 13 females). ^{2u}Of the
remaining 48 cases the causes in 40 ^{here} ~~was~~ ascertained to
be pre-disposition and in 8 as exciting.

29. As to the pre-disposing causes in 40 cases
(32 males & 8 females) there were histories of

	M.	F.	T.
~~Insane~~ Insane (heredity) <i>in</i>	2	1	3

	M.	F.	T.

	6 - 2 - 8		

31. Statement No.VIII: Shows the details of expenditure in connection with the Asylum during the year under review.

32. The expenditure as shown in statement No.VIII ^{being} ~~excluding~~ a sum of Rs.10,695-0-11 ~~covering~~ the receipts

Receipts &c:-		under the
Paying patients.	Rs.1837-7-7	marginally noted -
due by do.	Rs. 156-12-5	
C&M Stn.lunatics.	Rs.5510-7-9.	
due by do.	Rs.2176-11-4	
Sale of cloths.	Rs.549-0-2	heads which
Sale of vegetables		
fruits & grass.	Rs.444-11-7	were partly
Cleaning & grinding		
charges of raw ration		remitted to
articles.	Rs. 19-14-1.	
Total.	Rs.10695-0-11.	Treasury in

Cash and partly adjusted by transfer of accounts, came

came to Rs.32,385-9-8 against Rs.31,348-7-5 in the previous year, the increase being chiefly under diets, bedding & clothing and charges on excess consumption of water adjusted.

33. The small increase under diet, bedding and clothing is due to the general rise in the price of articles, on account of war conditions.

34. A sum of Rs.889-0-0 adjusted towards the charges for excess consumption of water during the year was an additional expenditure not incurred hitherto.

35. The annual cost per head of a European lunatic was Rs.220-11-2 against Rs.194-13-8 in the previous year, i.e., an excess of Rs.25-13-6 per head. The cost of an Indian lunatic per annum came to Rs.139-10-0 against Rs.130-3-8 i.e., Rs.9-6-4 in excess.

36. Statement No.IX:- Shows the scale of establishment as it stood on 31st December 1916. During the year under report the accounts of the Asylum for the year 1913-1914, 1914-1915 and 1915-1916 were audited for the first time, by an auditor deputed from the Comptroller's Office in pursuance of G.O.No.893-4/Med.41-15-20 dated 28-7-1916. The accounts disclosed the need for ^{of} the revision establishment.

37. Statement No.X: Shows receipts and expenditure under "manufacturing and gardening". The receipts under these heads during the year were Rs.549-0-2 by sale of cloth manufactured against Rs.577-9-9 in the previous year. ^{by sale} Rs.44-11-7 of vegetables, fruits and grass ^{under "wages for cleaning & grinding of raw-rubber articles"} against Rs.433-3-1 in 1915, and Rs.36-2-9 ^{in the year previous.} in the year-previous against Rs.17-13-7 ^{under} "wages for cleaning and grinding of raw-rubber articles."

The expenditure under the same heads were Rs.551-0-3 on account of purchases of raw materials, vegetable - seeds &c. including pay of maistry and gardener against Rs.795-4-10 in 1915. There was thus a net profit of Rs.478-14-3 against Rs.233-5-7 in 1915.

38. The daily average number of lunatics employed was 104.09, (15.04 on weaving and 7.66 on gardening and the rest 81.39, for "cleaning and sweeping purposes and grinding of ragi &c). The progressive accumulation of the demented and the admission into the Asylum of the very feeble and the sick, during this year also, allowed only a meagre proportion of the resident population being usefully or profitably employed. It is rather deceptive to estimate the economic output of lunatic labour merely by the ^{numerical} ~~commercial~~ strength of the insanes so employed, as the sole object with which the insane persons were sent out in gangs was to have their time occupied with a view to diminish the irritability of their excited brains and to infuse hope and courage into the minds of the depressed.

39. Sanitation of the Asylum and the health of the inmates:- The usual colour and white-washing during the year under report was not undertaken and completed by the Public Works Department authorities concerned.

The capacity of the cells and wards of the enclosures works out at 450 C.Ft. per head.

40. The maximum number of lunatics confined on a single night was ¹⁶⁵ ~~164~~ males and 78 females "on the 10th and 11th May 1916".

41. The physical condition of patients at the time of their admission during the year under review was as - recorded below:-

Of the 85 admissions, 58 were in good health, so far as their general physique is concerned: 9 were fairly - healthy: 15 were poorly being emaciated and an^aemic and 3 in a bad state of health necessitating treatment in hospital wards.

42. As usual the weak and the emaciated were collected together and special care was taken of them; excited persons were given rest and treatment.

43. There were 86 cases treated in hospital during the year with an average daily sick of 6.67.

44. The principal diseases for which they were - treated were:-

Fever 7; Dysent^ery 23; Ch: Diarrhoea 8; General Debility and old age 2; Epilepsy 4; Paralysⁱs 2; wounds and injuries 1; Tuberculos^eis 5; Dropsy 13; all other diseases 21.

45. Of the 20 deaths, 9 were amongst the new admissions of 1916 who were in bad state of health on admission and the remaining 11 out of those of the previous years. 6 of these were past middle age; 1 was 50 years old and 6 between 40 and 50. The remaining 7 were from 20 to 40 years of age. All these were treated in the hospital wards before their death.

46. Deaths were due to:-

General dropsy.	5.
Dysent ^e ry.	2
Epilepsy.	3.
Tuberculos ^e es of lungs.	5
General debility.	4
Cardiac failure.	1.

47. 19 post mortem examinations were held during

~~examinations were held~~ during the year under review.

48. Private patients:- At the beginning of the year there were 9 (6 males & 3 females) private patients and 11 (8 males and 3 females) were admitted during the year, making a total of 20 (14 males and 6 females). Of ^{these} ~~them~~ 13 (9 males and 4 females) were discharged during the year, leaving 7 (5 males and 2 females) under treatment at the close of the year.

A sum of Rs.1837-7-7 was recovered from the relations and guardians of the lunatics and remitted to the Treasury and a sum of Rs.156-12-5 was outstanding at the close of the year.

49. Lunatic of the C & M Station, Bangalore:- At the beginning of the year 1916 there were 30 males and 21 females and 17 males and 9 females were admitted during the year, making a total of 77 against 82 in the previous year.

Of these 21 were discharged (15 males and 6 females) and 3 died leaving [&] 29 males and 24 females at the close of the year.

The cost of maintenance of these patients came to Rs.7687-3-1 against 7011-7-5 in the previous year

50. The official visitors of the Mysore State visited the Asylum 41 times and those of the C & M Station, Bangalore, 9 times.

51. Periodical treats and gramophone entertainments were given during the year, especially on festival days and sweets and fruits were ^{re}distributed among the inmates who appreciated the gifts very well. Be-

Besides these, betel leaves and nuts and snuff of -- tobacco were daily distributed amongst those accustomed to their use and every attempt was made to keep the inmates happy.

52 The two-storied building referred to in the last report with quarters in the Upper Floor for the matron and 6 cells below for European excited female insanes was occupied during the year.

53. General Remarks.

The only change in the staff during the year was that of the transfer of 4th class Sub Assistant Surgeon T.H. Subbaramanya Iyer to Kolar Gold Fields, P.H. Laboratory. His place was taken up by passed Sub Assistant Surgeon S. amachendra Rao, under the orders of the --- Senior Surgeon, Mysore Government.

M

LEPER ASYLUM.

There were 37 inmates (27 males and 10 females) at the beginning of the year under report and 36 (27 males and 9 females) were admitted during the year, making a total of 73 (54 males and 19 females), against 66 (50 males and 16 females) in 1915. Of these (viz 73), 43 were discharged and 6 died, leaving 24 (14 males and 10 females) inmates at the end of the year.

The daily average strength of the Asylum during the year was 23.19 against 27.89 in 1915.

The percentage of total mortality to number admitted, was 8.22 against 16.66 in 1915.

used The usual treatment of Chalmogra oil internally and Margosa oil externally was adopted.

The total cost of the up-keep of the Asylum during the year under report amounted to Rs. 4052-8-9, against Rs. 4045-4-0 in 1915. The subjoined table shows the details of expenditure during the year under report, with corresponding figures for the previous year.

Particulars of expenditure.	1916	1915
Establishment charges	Rs 1549-11-4	Rs 1428-13-5
Dieting charges-	1668-13-7	1999-9-6
Contingent charges	833-15-10	616-13-1
Total Rs	4052- 8-9	4045- 4-0

Lepers of the Civil and Military Station, Bangalore.

The number remained at the beginning of the year was 3 males. The number admitted during the year was 8 (7 males and 1 female). The cost of their maintenance claimed during the year under report was Rs. 356-13-4.

The average cost per head per diem was Rs. 0-7-8, against Rs. 0-6-4 in 1915.

Maternity and Hospital for
women and children at Bangalore.

In-patients

The number of in-door patients treated during the year was 973, of which 724 were labour cases, the remaining 249 being cases of diseases peculiar to women, against 673 and 264, respectively, in the previous year, showing an increase of 51 in labour cases and a decrease of 15 in other cases. The daily average of in-patients was 21.58, against 20.36 in 1915.

The number of deaths during the year under report was 10, the same as in the year previous. This gives a percentage of 1.03 on the total admissions, against 1.07 in 1915.

Of the 973 admissions, 943 were discharged cured, 20 relieved and 10 died.

Out-patients

Journal
oh
The total number of out-door patients treated was 13,521 against 16,437 in the previous year. Of this number (viz 13,521), 12,139 attended personally & 1382 were represented by friends. The average daily attendance of out-patients was 80.13, against 88.33 in 1915.

The number patients treated (both in-door & out-door patients), according to classes is shown below for the year 1916.

1916	Europeans and Eurasians	Mahomedans-	Hindus-	Other classes	Total
In-door	73	74	823	3	973
Out-door	777	2142	10379	223	13521
Total	850	2216	11202	226	14494

The appended statement shows the number of surgical operations performed during the year, which was 1300, against 1440 in 1915. Of this number (viz 1300), 838 were discharged cured, 447 were relieved, 8 were discharged otherwise and 7 died.

Finance

The total cost of the Institution was Rs 16,654, against Rs. 16,821 in 1915. The cost per patient per day was Rs 2-1-10 for in-patients, 0-9-1 for out-patients and 0-7-2 for in and out-patients taken together.

General Remarks

There were 7 pupil Midwives under training at the beginning of the year under report and 6 were taken on during the year, making a total of 13, of these, 7 pupils passed out and 6 were under training at the end of the year.

Dr. Miss R. Govindarajulu, M.D., continued to be in charge of the Institution during the year.

MATERNITY and HOSPITAL AT ROBERTSONPET.

In-patients

The number of in-patients treated during the year was 485, of which 313 were labour cases, the remaining 172 being cases of diseases peculiar to women, against 214 and 161 respectively in the previous year. The daily average number of in-patients was 11.27 against 11.59 in 1915.

Of the 485 admissions, 450 were discharged cured, 14 relieved, 3 discharged otherwise, 13 died and 5 remained under treatment at the end of the year. The death rate, calculated on the total number of admissions was 2.68 against 0.80 in 1915.

Out-patients

The number of out-patients treated was 16,258, against 13,823 in 1915. Of this number (viz 16,258), 14,126 attended personally and 2132 were represented by friends. The average daily number of sick was 101.40 against 91.76 in 1915.

The number of patients treated (both in-door and out-door) according to classes is shown below.

1916	Europeans and Eurasians.	Mahomedans -	Hindus -	Other classes	Total
In-door	101	13	371	-	485
Out-door	2287	2301	11670	-	16258
Total	2388	2314	12041	-	16743

The

The number of patients on whom surgical operations were performed during the year was 1276, as shown in the appended statement against 309 in 1915. Of this number (viz 1276), 659 were discharged cured, 612 were relieved and 5 died.

Financia-.

The total cost of the institution was Rs. 11097/-, against Rs. 8173/- in 1915. The cost per patient per day was Rs. 2-12-11 for in-patients, Rs. 0-4-11 for out-patients, *and Rs 0-4-6 for in and out-patients* taken together.

General Remarks.

The only pupil that was under training at the beginning of the year under report passed out.

Assistant Lady Medical Officer Miss A.G. Allen, L.M.S., was in charge of the Hospital till 20th January 1916, when she was transferred to the Vani Vilas Hospital, Mysore, and was succeeded by Lady Apothecary Mrs L. Holman Rozario, who remained in charge for the rest of the year.

THE VANI VILAS HOSPITAL, M Y S O R E.

In-patients.

The number of in-patients treated during the year was 532, of which 352 were labour cases, the remaining 180 being cases of diseases peculiar to women, against 345 and 217 respectively, for the previous year, showing an increase of 7 in labour cases and a decrease of 37 in other cases. There were 14 deaths or 9 less than in the year previous. This gives a percentage of 2.63 on the total admissions, against 4.09 in 1915.

The daily average number of in-patients was 13.94 against 15.95. Of the 532 patients admitted, 406 were discharged cured, 38 relieved, 56 discharged otherwise, 14 died and 18 remained under treatment at the close of the year.

Out-patients.

The number of out-patients treated during the year was 9968 against 12242, showing a decrease of 2274. Of this (viz 9968), 8817 attended personally and 1151 were represented by friends. The average daily attendance was 81.17, against 111.36 in 1915, showing a decrease of 30.19.

The

The number of patients treated (both in-door and out-door) according to classes, is shown below:-

1916	Europeans and Eurasians	Mahomedans-	Hindus-	Other classes	Total
In-door	9	102	419	2	532
Out-door	47	2770	7087	64	9968
Total	56	2872	7506	66	10500

The number of patients on whom surgical operations were performed during the year was 797 (including one case of the previous year), as shown in the appended statement, against 1737 in 1915. Of this number (viz 797), 721 were discharged cured, 67 relieved, discharged otherwise, 5 died and 3 remained under treatment at the close of the year.

Financ

The total cost of the institution was Rs. 12930/- against Rs. 13838/- in the previous year. The cost per patient per day was Rs. 2-8-8 for in-patients, Rs 0-6-11 for out-patients and Rs 0-5-11 for in and out-patients taken together.

General Remarks.

There were 5 pupil Midwives under training at the beginning of the year under report, and 6 were taken on during the year, making a total of 11. Of these, 4 passed out, one resigned and 6 were under training at the close of the year.

Lady Medical Officer Miss Ayacheammal, L.M.S., continued to be in charge of the institution during the year.

ISOLATION HOSPITAL, B A N G A L O R E.

This hospital is situated at the western end of the City Railway Station, and is available for the accommodation and treatment of cases of infectious diseases.

The total number of patients treated during the year was 650, against 562 in 1915, as detailed below:-

Cholera	...	-
plague	...	293
Small-pox	...	13
Other		
diseases	...	344
Total		<u>562</u> 650

There were 180 deaths from plague, against 23 in 1915.

The total cost of the institution was Rs. 8565-12-11, against Rs. 7994-3-3 in 1915.

The cost per head of patient treated was Rs. 13-2-10 against Rs. 14-3-7.1 nearly.

Proceedings of the Government of H. H.
the Maharaja of Mysore.

---oOo---

R e a d :--

16.12.17.
By Mr B. P. K. ...

Report on the working of the Special Hospitals in Mysore for the calender year 1916 received with the Senior Surgeon's letter No. G. C. 215 dated 19th September 1917.

Order No. 3452-3 made 24.9.17. 2

Dated Bangalore, 28.12. 1917.

R e c o r d e d ^{nearly}

2. The delay of 5 months in the submission of the report in spite of the observations made in the reviews of previous years is unsatisfactory.

3. The Lunatic Asylum.

The total number of insanes treated during the year was 300, including 77 of the C & M Station, against 350 in 1915. Of these 36 were cured, 39 discharged in an improved condition and 3 transferred to friends. The percentage of cures to the daily average attendance, which was only 16.68 against 23.56 ^{in 1915}, does not compare favourably ^{even} with the record of the previous 6 years.

and one among persons under observation

There were 19 deaths during the year among the inmates of the Asylum. ^{The} ~~cause of death in each case should have~~

~~been~~

Causes are given in para 46 of report. Hence ^{the sentence} may be omitted.

been indicated.

(The general health of the inmates seems to demand ~~great~~ ^{special} attention ~~was not good during the year~~)

It is unsatisfactory to note that the usual white and colour washing to the buildings was not ~~undertaken and completed~~ ^{attended to by the P. W. D.} during the year.

4. Lepet Asylum.

This institution afforded relief to 73 unfortunates during the year of whom 43 were discharged and 6 died. It is noted that the usual treatment of administering Chal^mogro oil internally and Margo^a oil externally was adopted, but the results of the treatment ~~should have~~ ^{have} been indicated in the report.

5. Maternity Hospitals.

The Maternity Hospital at Robertsonpet showed a considerable increase ^{both} in the number of in-patients and out-door - - - patients ^{treated} during the year, ~~which testifies~~ ^{an indication of} to its growing popularity. In the Bangalore Maternity Hospital as well as in the Vani Vilas Hospital, Mysore, there was a large decrease in the number of out-door patients, the number treated during the year in each institution being 13521 and 9968 against 16437 and 12242 respectively in 1915. No explanation for this decrease has been given in the report.

6. Isolation Hospital. ^{Banacalae}

The total number treated during the year was 650 against 562 in 1915. and the cost of the institution was Rs. 8566 - - against 7994 in 1915.

Included as ^{probationary} ~~member~~ but
this may be omitted as it

Report on the working of the Special Hospitals in Mysore for the calendar year 1916 received with the Senior Surgeon's letter No. G. C. 215, dated 19th September 1917.

Order No. 3452-3—Med. 49-17-2, dated 28th December 1917.

Recorded.

2. The delay of nearly five months in the submission of the report in spite of the observations made in the reviews of previous years is unsatisfactory.

3. *The Lunatic Asylum*.—The total number of insanes treated during the year was 300, including 77 of the Civil and Military Station, against 350 in 1915. Of these 36 were cured, 39 discharged in an improved condition and three transferred to friends. The percentage of cures to the daily average attendance, which was only 16.68 against 23.66 in 1915 does not compare favourably even with the record of the previous six years.

There were 19 deaths during the year among the inmates of the Asylum and 1 among persons under observation. The general health of the inmates seems to demand greater attention.

It is unsatisfactory to note that the usual white and colourwashing to the buildings was not attended to by the Public Works Department during the year.

4. *Leper Asylum*.—This institution afforded relief to 73 unfortunates during the year, of whom 43 were discharged and 6 died. It is noted that the usual treatment of administering Chalmogra oil internally and Margosa oil externally was adopted, but the result of the treatment has not been indicated in the report.

5. *Maternity Hospitals*.—The Maternity Hospital at Robertsonpet, showed a considerable increase both in the number of in-patients and out-door patients treated during the year, thereby indicating its growing popularity. In the Bangalore Maternity Hospital, as well as in the Vani Vilas Hospital, Mysore, there was a large decrease in the number of out-door patients, the number treated during the year in each institution being 13,521 and 9,968 against 16,437 and 12,242, respectively, in 1915. No explanation for this decrease has been given in the report.

6. *Isolation Hospital, Bangalore*.—The total number treated during the year was 650 against 562 in 1915 and the cost of the institution was Rs. 8,566 against Rs. 7,994 in 1915.

7. *The Minto Ophthalmic Hospital*.—The number of in-patients treated during the year was 1,587 against 1,481 in 1915. There was a decrease of 943 in the number of out-patients treated.

The cost of institution rose from Rs. 24,363 to Rs. 30,156.

8. *General*.—The attention of the Senior Surgeon is invited to the importance of periodical inspections of these Special Hospitals and he is requested to devote a paragraph in future Administration Reports to this matter, special reference being made to the condition of buildings, accommodation and equipment.

PRESS TABLE.

REPORT ON THE WORKING OF THE SPECIAL HOSPITALS IN MYSORE, FOR THE CALENDAR YEAR 1916.

LUNATIC ASYLUM.

Rao Bahadur Rajakaryapravina Dr. T. V. Arumugam Mudaliar, M.B., C.M., continued to be the Senior Surgeon in charge of the Asylum throughout the year, with Surgeon Mr. W. Srinivasa Iyengar, M.B., C.M., in sub-charge, as Superintendent.

2. *Statement No. I.*—Shows the number of insanes treated during the year and their disposal:

The year opened with 141 males and 74 females, or 215 in all under treatment: there were 85 admissions (62 males and 23 females) during the year including 2 re-admissions.

3. The total number of insanes treated during the year was 300 (203 males and 97 females), the daily average number resident being 215·82 against 228·26 in the year 1915.

4. The number of persons discharged during the year was 78 against 100 in the previous year. Of these 36 were cured, 39 improved and 3 not improved, against 54, 40, 4 and 2 otherwise discharged respectively in the previous year. The percentage of cases discharged as compared with the number of admissions was as follows:—

					1916.	1915.
Cured	...	...	...	...	42·35%	39·42%
Improved	...	...	...	...	45·89%	29·20%
			Total	...	88·24%	68·62%

5. The number of deaths during the year was 19 or 8·80% of the average strength against 35, or 15·33% in 1915.

6. The duration of insanity of the patients admitted during the year was ascertained in 46 cases. Of these 16 or 34·78% are reported to have been ill for less than 3 months prior to their admission; 13 or 28·26% between 3 and 6 months; 6 or 13·05% between 6 and 12; 11 or 23·91% from 1 year to several years (8 between 1 and 2 years, 1 between 2 and 5 years, 1, 12 years, and 1, 20 years). In 39 cases the duration of illness was not ascertainable.

7. Of the 36 patients, who were cured, the duration of mental disease prior to admission is recorded in 22 cases. In 10 cases it was less than three months; in 4 between 3 and 6 months; in 1 between 6 and 12 months; and in 7 more than a year. In the other 14 cases, the duration of disease is stated to have been not ascertainable.

8. The average stay in the Asylum of the patients that were cured was 1 year 2 months and 17 days, the shortest being 1 month and 29 days and the longest 18 years, 2 months and 8 days.

9. *Statement No. I.-A.*—Shows the cases of insanity admitted for observation and their disposal. There were 8 at the commencement of the year under observation, and 89 were admitted during the year, making a total of 97 (75 males and 22 females). Of these 69 were pronounced insane and admitted as such, 23 were handed over to their relatives under the orders of the Magistrates, 2 were pronounced sane and discharged, and 1 died, leaving at the close of the year, 2 under observation (1 male and 1 female).

10. *Combining Statements I and I.-A.*—There were in all 105 admissions into the Asylum during the year against 147 in the year previous. The daily average strength was 226·24 against 236·12.

11. Of the 105 admissions during the year, 89 were examined and certified by the Superintendent of the Lunatic Asylum and the remaining 16 by other Medical Officers, *viz.*, 1 by the District Medical Officer, Mysore; 3 by the District Medical Officer, Kadur; 1 by the District Medical Officer, Kolar; 2 by the District Medical Officer, Chitaldrug; 2 by the District Medical Officer, Shimoga; 3 by the District Medical Officer, Tumkur; 3 by the Medical Officer, Mysore Jail; and 1 by the Medical Officer, Central Jail, Bangalore.

12. *Statement No. II.*—This is the return of criminals among the Asylum population. On 1st January 1916, there were 28 such patients (25 males and 3 females) and 6 were admitted during the year, making a total of 34 (31 males and 3 females). Their daily average strength was 28.65 (25.65 males and 3.00 females) against 28.92 (25.83 males and 3.09 females) in the year 1915.

There were four discharges and two deaths among them (4 males and 2 females respectively) leaving 28 (25 males and 3 females) at the close of the year.

13. Of the 6 admissions who were under trials one was charged under Section 309, Indian Penal Code, one under Section 352, Indian Penal Code, one under Section 435, Indian Penal Code, one under Section 457, Indian Penal Code, and two for murder.

Of the four who were discharged all were sent to stand their trial.

There were two deaths among the criminals during the year under report.

14. The following is the classification of the criminals remaining at the close of the year:—

Undertrial prisoners	...	...	...	...	25
Criminal Lunatics tried and acquitted	...	...	...	...	1
Lunatic Criminals	...	...	...	...	2
				Total	28

The offences with which they were charged are:—

Voluntarily causing hurt (457 Indian Penal Code)	...	...	...	2
Lurking house-trespass (323, Indian Penal Code)	...	...	...	1
Culpable homicide not amounting to murder (304, Indian Penal Code)	...	...	...	1
Hurt with dangerous weapon	...	...	...	1
Murder (302, Indian Penal Code)	...	...	...	7
Offence under Section 31, Railway Act	...	...	...	1
Murder and culpable homicide not amounting to murder (302 and 304, Indian Penal Code)	...	...	...	1
Attempt to commit suicide (309, Indian Penal Code)	...	...	...	2
Theft in a dwelling house and lurking house trespass (380 and 457, Indian Penal Code)	...	...	...	3
Theft	...	...	...	4
Theft in a dwelling house and causing grievous hurt while committing lurking house-trespass (380 and 459, Indian Penal Code)	...	...	...	1
Mischief by fire	...	...	...	1
Culpable homicide not amounting to murder under Section (323 or 325, Indian Penal Code)	...	...	...	1
Voluntarily causing hurt by a dangerous weapon (324, Indian Penal Code)	...	...	...	1
Murder or culpable homicide not amounting to murder (302 or 304, Indian Penal Code)	...	...	...	1
			Total	28

15. *Statement No. III.*—Shows sex, residence and religion of the admission during the year 1916. Of the 85 admissions 62 or 72.94% were males and 23 or 27.06% were females.

17. Twenty-six were residents of the Civil and Military Station of Bangalore, 45 belonged to the Mysore State (Bangalore District contributing 19, Mysore 8, Kadur 3, Kolar 5, Hassan 2, Chitaldrug 2, Tumkur 4, and Shimoga 2). Out of the remaining 14.6 were residents of British Territory and the residences of 8 are not known.

18. Sixty-three (44 males and 19 females) or 74.12% of the admission were Hindus 15 (13 males and 2 females), or 17.65% were Mahomedans and 7 (5 males and 2 females) or 8.23% were Christians.

19. Classified according to religion, of the 203 Lunatics that remained at the close of the year 129 (85 males and 44 females) or 63.55% were Hindus; 38 (14

males and 24 females) or 18.72% were Mahomedans; 36 (29 males and 7 females) or 17.73% were Christians.

The Hindus include 13 Brahmins (7 males and 6 females). The Christians include 27 Europeans and Eurasians (8 males and 19 females).

20. *Statement No. IV.*—Shows the occupation of the patients admitted during the year.

Of the 62 male admissions 8 had no occupation whatever, and the occupation of 7 was not known. Nine were agriculturists, 10 business-men, 13 were labourers, 7 Government servants, 4 pensioners, 1 palace servant, and 3 students.

21. Of the 23 female admissions 3 were looking after house-hold affairs, 1 was a cooly, 1 a cultivator, 10 had no occupation, whatever, and in the remaining 8 the occupation was not known.

22. *Statement No. V.*—Shows the ages of patients admitted during the year.

As usual the largest number, viz., 57 or 67.06% were between 20 and 40 years, 19 or 22.35% were between 40 and 60 years, 7 or 8.23% were under 20 years and 2 or 2.36% were over 60 years.

23. *Statement No. VI.*—Shows the distribution of lunatics in the Asylum during the year according to the types of insanity.

24. Of the patients that remained on 31st December 1915 there were under:—

	Males	Females	Total
I. Errors of development.—			
Idiocy ...	4	5	9
II. Disorders of function.—			
Mania, all forms ...	47	38	85
Malancholia, all forms ...	15	11	26
Circular insanity ...	1	1	2
Mental stupor ...	2	...	2
Delusional insanity ...	16	3	19
Moral insanity ...	3	2	5
Impulsive and obsessive insanity ...	3	...	3
III. Results of infection.—

IV. Degenerations.—			
Epileptic insanity ...	2	1	3
Other forms ...	31	13	44
Total ...	141	74	215

25. The admissions show the following types of insanity:—

	Males	Females	Total
I. Errors of development.—			
Idiocy ...	1	1	2
II. Disorders of function.—			
Mania all forms ...	31	13	44
Malancholia all forms ...	11	5	16
III. Result of infection.—			
Toxic and other general conditions.—			
Post febrile insanity ...	3	1	4
Alcoholic insanity ...	5	2	7
Insanity of Haschisch ...	6	...	6
Insanity from other causes... ..	2	...	2
IV. Degenerations.—			
Senile ...	...	1	1
Epileptic ...	2	...	2
Other forms ...	1	...	1
Total ...	62	23	85

26. Of the patients that were cured, viz., 36 (29 males and 7 females).

19 (12 males and 7 females) suffered from some forms of mania.

4 males suffered from some form of melancholia.

1 male do some form of mental stupor.

2 males do post-febrile insanity.

1 male do from confusional insanity.

2 males do from alcoholic insanity.

5 males do from insanity of Haschisch.

1 male do from insanity from other causes.

1 male do from epileptic insanity.

27. There were 19 deaths (15 males and 4 females) during the year under report. Among them 8 males and 1 female were suffering from some form of mania, 1 male from melancholia, 1 male from delusional insanity, 1 male from post febrile insanity, 1 female from alcoholic insanity, 1 male from insanity of haschisch, 1 female from senile-insanity, 1 male from epileptic insanity and 2 males and 1 female from dementia.

28. *Statement No. VII.*—Among the 85 cases admitted no cause either pre-disposing or exciting was ascertainable in 37 cases (24 males and 13 females). In the remaining 48 cases the causes in 40 were ascertained to be pre-disposition and in 8 as exciting.

29. As to the pre-disposing causes in 40 cases (32 males and 8 females), there were histories of—

					M.	F.	T.

31. *Statement No. VIII.*—Shows the details of expenditure in connection with the Asylum during the year under review.

32. The expenditure as-shown in statement No. VIII excluding a sum of

<i>Receipts, etc.</i>				Rs. a. p.			Rs. 10,695-0-11 covering the receipts under marginally noted heads which were partly remitted to Treasury in cash and partly adjusted by transfer of accounts, came to Rs. 32,385-9-8 against Rs. 31,348-7-5 in the previous year, the increase being chiefly under diets, bedding and clothing and charges on excess consumption of water.
Paying patients	...	...	...	1,837	7	7	
Due by do	...	...	...	156	12	5	
C. & M. Station lunatics	...	...	...	5,510	7	9	
Due by do	...	...	...	2,176	11	4	
Sale of cloths	...	...	...	549	0	2	
Sale of vegetables, fruits and grass	...	...	...	444	11	7	
Cleaning and grinding charges of raw ration articles	...	...	...	19	14	1	
Total				10,695	0	11	

33. The small increase under diet, bedding and clothing is due to the general rise in the price of articles, on account of war conditions.

34. A sum of Rs. 889-0-0 adjusted towards the charges for excess consumption of water during the year was an additional expenditure not incurred hitherto.

35. The annual cost per head of a European lunatic was Rs. 220-11-2 against Rs. 194-13-8 in the previous year, i.e., an excess of Rs. 25-13-6 per head. The cost of an Indian lunatic per annum came to Rs. 139-10-0 against Rs. 130-3-3 i.e., Rs. 9-6-4 in excess.

36. *Statement No. IX.*—Shows the scale of establishment as it stood on 31st December 1916. During the year under report the accounts of the Asylum for the year 1913-14, 1914-15 and 1915-16 were audited for the first time, by an auditor deputed from the Comptroller's Office in pursuance of Government Order No. 893-4.—Med. 41-15-20, dated 28th July 1916. The accounts disclosed the need for a revision of establishment.

37. *Statement No. X.*—Shows receipts and expenditure under "manufacturing and gardening." The receipts under these heads during the year were Rs. 549-0-2 by sale of cloth manufactured against Rs. 577-9-9 in the previous year. Rs. 444-11-7 by sale of vegetables, fruits and grass against Rs. 433-3-1 in 1915, and Rs. 36-2-9 under "wages for cleaning and grinding of raw-rum articles" against Rs. 17-13-7 in the year previous.

The expenditure under the same heads were Rs. 551-0-3 on account of purchases of raw materials, vegetable seeds, etc., including pay of mistry and gardener against Rs. 795-4-10 in 1915. There was thus a net profit of Rs. 478-14-3 against Rs. 233-5-7 in 1915.

38. The daily average number of lunatics employed was 104.09 (15.01 on weaving and 7.66 on gardening and the rest 81.39, for cleaning and sweeping purposes grinding ragi, etc.). The progressive accumulation of the demented and the admission into the Asylum of the very feeble and the sick, during this year also, allowed only a meagre proportion of the resident population being usefully or profitably employed. It is rather deceptive to estimate the economic out-turn of lunatic labour merely by the numerical strength of the insanes so employed, as the sole object with which insane persons were sent out in gangs was to have their time occupied with a view to diminish the irritability of their excited brains and to infuse hope and courage into the minds of the depressed.

39. *Sanitation of the Asylum and the health of the inmates.*—The usual colour and whitewashing during the year under report was not undertaken and completed by the Public Works Department authorities concerned.

The capacity of the cells and wards of the enclosure works out at 450 c. ft. per head.

40. The maximum number of lunatics confined on a single night was 165 males and 78 females "on 10th and 11th May 1916."

41. The physical condition of patients at the time of their admission during the year under review was as recorded below:—

Of the 85 admissions, 58 were in good health, so far as their general physique is concerned: 9 were fairly healthy: 15 were poorly, being emaciated and anaemic and 3 in a bad state of health necessitating treatment in hospital wards.

42. As usual the weak and the emaciated were collected together and special care was taken of them; excited persons were given rest and treatment.

43. There were 86 cases treated in hospital during the year with an average daily sick of 6.67.

44. The principal diseases for which they were treated were:—

Fever 7; Dysentery 23; Ch: Diarrhoea 8; General Debility and old age 2; Epilepsy 4; Paralysis 2; wounds and injuries 1; Tuberculoses 5; Dropsy 13; all other diseases 21.

45. Of the 20 deaths, 9 were amongst the new admissions of 1916 who were in bad state of health on admission, and the remaining 11 out of those of the previous years. Six of these were past middle age; 1 was 50 years old and 6 between 40 and 50. The remaining 7 were from 20 to 40 years of age. All these were treated in the hospital wards before their death.

46. Deaths were due to:—

General dropsy	...	...	...	...	5
Dysentery	...	...	...	...	2
Epilepsy	...	...	...	...	3
Tuberculoses of lungs	...	...	...	...	5
General debility	...	...	...	...	4
Cardiac failure	...	...	...	...	1

47. *Nineteen post mortem* examinations were held during the year under review.

48. *Private patients.*—At the beginning of the year there were 9 (6 males and 3 females) private-patients and 11 (8 males and 3 females) were admitted during the year, making a total of 20 (14 males and 6 females). Of these 13 (9 males and 4 females) were discharged during the year, leaving 7 (5 males and 2 females) under treatment at the close of the year.

A sum of Rs. 1,837-7-7 was recovered from the relations and guardians of the lunatics and remitted to the Treasury, and a sum of Rs. 156-12-5 was outstanding at the close of the year.

49. *Lunatic of the Civil and Military Station, Bangalore.*—At the beginning of the year 1916, there were 30 males and 21 females, and 17 males and 9 females were admitted during the year, making a total of 77 against 82 in the previous year.

Of these 21 were discharged (15 males and 6 females) and 3 died, leaving 29 males and 24 females at the close of the year.

The cost of maintenance of these patients came to Rs. 7,687-3-1 against Rs. 7,011-7-5, in the previous year.

50. The official visitors of the Mysore State visited the Asylum 11 times and those of the Civil and Military Station, Bangalore, 9 times.

51. Periodical treats and gramophone entertainments were given during the year, especially on festival days and sweets and fruits were distributed among the inmates who appreciated the gifts very well. Besides these, betel leaves and nuts and snuff of tobacco were daily distributed amongst those accustomed to their use and every attempt was made to keep the inmates happy.

52. The two-storied building referred to in the last report with quarters in the Upper Floor for the matron and 6 cells below for European excited female insanes was occupied during the year.

53. *General remarks.*—The only change in the staff during the year was that of the transfer of 4th class Sub-Assistant Surgeon T. N. Subbaramanya Iyer to Kolar Gold Fields P. H. Laboratory. His place was taken up by passed Sub-Assistant Surgeon S. Ramachandra Rao, under the orders of the Senior Surgeon, Mysore Government.

LEPER ASYLUM.

There were 37 inmates (27 males and 10 females) at the beginning of the year under report and 36 (27 males and 9 females) were admitted during the year, making a total of 73, (54 males and 19 females) against 66 (50 males and 16 females) in 1915. Of these (*viz.*, 73), 43 were discharged and 6 died, leaving 24 (14 males and 10 females), inmates at the end of the year.

The daily average strength of the Asylum during the year was 23.19 against 27.89 in 1915.

The percentage of total mortality to number admitted was 8.22 against 16.66 in 1915.

The usual treatment of Chalmogra oil internally and Margosa oil externally was adopted.

The total cost of the up-keep of the Asylum during the year under report amounted to Rs. 4,052-8-9 against Rs. 4,045-4-0 in 1915. The subjoined table

shows the details of expenditure during the year under report, with corresponding figures for the previous year.

Particulars of expenditure	1916	1915
	Rs. a. p.	Rs. a. p.
Establishment charges	1,549 11 4	1,428 13 5
Dieting charges	1,668 13 7	1,999 9 6
Contingent charges	833 15 10	616 13 1
Total	4,052 8 9	4,045 4 0

Lepers of the Civil and Military Station, Bangalore.

The number remained at the beginning of the year was 3 males. The number admitted during the year was 8 (7 males and 1 female). The cost of their maintenance claimed during the year under report was Rs. 356-13-4.

The average cost per head per diem was Re. 0-7-8 against Re. 0-6-4 in 1915.

MATERNITY AND HOSPITAL FOR WOMEN AND CHILDREN AT BANGALORE.

In-patients.—The number of in-door patients treated during the year was 973, of which 724 were labour cases, the remaining 249 being cases of diseases peculiar to women against 673 and 264, respectively, in the previous year, showing an increase of 51 in labour cases and a decrease of 15 in other cases. The daily average of in-patients was 21·58, against 20·36 in 1915.

The number of deaths during the year under report was 10 the same as in the year previous. This gives a percentage of 1·03 on the total admissions against 1·07 in 1915.

Of the 973 admissions, 943 were discharged cured, 20 relieved and 10 died.

Out-patients.—The total number of out-door patients treated was 13,521 against 16,437 in the previous year. Of this number (*viz.*, 13,521) 12,139 attended personally and 1,382 were represented by friends. The average daily attendance of out-patients was 80·18 against 88·33 in 1915.

The number patients treated (both in-door and out-door patients) according to classes is shown below for the year 1916.

1916	Europeans and Eurasians	Mahomedans	Hindus	Other classes	Total
In-door	73	74	823	3	973
Out-door	777	2,142	10,379	223	13,521
Total	850	2,216	11,203	226	14,494

The appended statement shows the number of surgical operations performed during the year which was 1,300 against 1,400 in 1915. Of this number (*viz.*, 1,300) 838 were discharged cured, 447 were relieved, 8 were discharged otherwise and 7 died.

12600

Financial.—The total cost of the Institution was Rs. 16,654 against Rs. 16,821 in 1915. The cost per patient per day was Rs. 2-1-10 for in-patients, 0-9-1 for out-patients and 0-7-2 for in and out-patients taken together.

General Remarks.—There were 7 pupil midwives under training at the beginning of the year under report and 6 were taken on during the year, making a total of 13 of these, 7 pupil passed out and 6 were under training at the end of the year.

Dr. Miss R. Govindarajulu, M.D., continued to be in charge of the Institution during the year.

MATERNITY AND HOSPITAL AT ROBERTSONPET.

In-patients.—The number of in-patients treated during the year was 485, of which 313 were labour cases, the remaining 172 being cases of diseases peculiar to women, against 214 and 16 respectively in the previous year. The daily average number of in-patients was 11.27 against 11.59 in 1915.

Of the 485 admissions, 450 were discharged cured, 14 relieved, 3 discharged otherwise, 13 died and 5 remained under treatment at the end of the year. The death rate, calculated on the total number of admissions was 2.68 against 0.80 in 1915.

Out-patients.—The number of out-patients treated was 16,258 against 13,823 in 1915. Of this number (*viz.*, 16,258), 14,126 attended personally and 2,132 were represented by friends. The average daily number of sick was 101.40 against 91.76 in 1915.

The number of patients treated (both in-door and out-door) according to classes is shown below:—

1916		Europeans and Eurasians	Mahomedans	Hindus	Other classes	Total
In-door	...	101	13	371	...	485
Out-door	...	2,287	2,301	11,670	...	16,258
Total	...	2,388	2,314	12,041	...	16,743

The number of patients on whom surgical operations were performed during the year was 1,276, as shown in the appended statement, against 309 in 1915. Of this number (*viz.*, 1,276), 659 were discharged cured, 612 were relieved and 5 died.

Financial.—The total cost of the institution was Rs. 11,097 against Rs. 8,173 in 1915. The cost per patient per day was Rs. 2-12-11 for in-patients, Re. 0-4-11 for out-patients and Re. 0-4-6 for in and out-patients taken together.

General Remarks.—The only pupil that was under training at the beginning of the year under report passed out.

Assistant Lady Medical Officer Miss A. G. Allen, L.M.S., was in charge of the Hospital till 20th January 1916, when she was transferred to the Vani Vilas Hospital, Mysore, and was succeeded by Lady Apothecary Mrs. L. Holman, Rozario, who remained in charge for the rest of the year.

THE VANIVILAS HOSPITAL, MYSORE.

In-patients.—The number of in-patients treated during the year was 532, of which 352 were labour cases, the remaining 180 being cases of diseases peculiar to women, against 345 and 217, respectively, for the previous year, showing an increase of 7 in labour cases and a decrease of 37 in other cases. There were 14 deaths or 9 less than in the year previous. This gives a percentage of 2·63 on the total admissions against 4·09 in 1915.

The daily average number of in-patients was 13·94 against 15·95. Of the 532 patients admitted, 406 were discharged cured, 38 relieved, 56 discharged otherwise, 14 died and 18 remained under treatment at the close of the year.

Out-patients.—The number of out-patients treated during the year was 9,968 against 12,242, showing a decrease of 2,274. Of this (*viz.*, 9,968) 8,817 attended personally and 1,151 were represented by friends. The average daily attendance was 81·17 against 111·36 in 1915, showing a decrease of 30·19.

The number of patients treated (both in-door and out-door) according to classes is shown below:—

1916			Europeans and Eurasians	Mahomedans	Hindus	Other classes	Total
In-door	...	...	9	102	419	2	532
Out-door	...	...	47	2,770	7,087	64	9,968
Total	...	...	56	2,872	7,506	66	10,500

The number of patients on whom surgical operations were performed during the year was 797 (including one case of the previous year), as shown in the appended statement against 1,737 in 1915. Of this number (*viz.*, 797) 721 were discharged cured, 67 relieved, 1 discharged otherwise, 5 died and 3 remained under treatment at the close of the year.

Financial.—The total cost of the institution was Rs. 12,930 against Rs. 13,838 in the previous year. The cost per patient per day was Rs. 2-8-8 for in-patients. Re. 0-6-11 for out-patients and Rs. 0-5-11 for in and out-patients taken together.

General Remarks.—There were 5 pupil midwives under training at the beginning of the year under report, and 6 were taken on during the year, making a total of 11. Of these 4 passed out, one resigned and 6 were under training at the close of the year.

Lady Medical Officer Miss Ayacheammal, L.M.S., continued to be in charge of the institution during the year.

ISOLATION HOSPITAL, BANGALORE.

This hospital is situated at the western end of the City Railway Station, and is available for the accommodation and treatment of cases of infectious diseases.

The total number of patients treated during the year was 650 against 562 in 1915, as detailed below:—

Cholera	...	...	...	...	...
Plague	...	...	...	...	293
Small-pox	...	...	...	...	13
Other diseases...	...	...	...	...	344
Total					650

There were 180 deaths from plague against 23 in 1915.

The total cost of the institution was Rs. 8,565-12-11 against Rs. 7,994-3-3 in 1915.

The cost per head of patient treated was Rs. 13-2-10 against Rs. 14-3-7·1 nearly.

MINTO OPHTHALMIC HOSPITAL, BANGALORE.

The number of in-patients treated during the year was 1,587 against 1,481 in 1915, showing the increase of 106. Of this number (*viz.*, 1,587), 764 were cured, 639 were relieved, 16 failed, 87 were discharged otherwise and 81 remained under treatment at the close of the year. The number out-patients treated during the year was 14,549 against 15,492 in the year previous. The total number of both in and out-patients was 16,136 against 16,973 in the previous year.

The following is an abstract return of diseases treated during the year 1916:—

Diseases					In-patients	Out-patients
Diseases of conjunctiva	...	...	...	...	236	8,041
Do cornea	...	...	...	...	195	1,177
Do sclera	...	...	...	...	2	37
Do iris	...	...	...	...	178	420
Do choroid and ciliary body	...	...	...	...	2	171
Glaucoma	...	...	...	...	112	245
Diseases of optic ~~nerve~~ and retina	...	...	...	...	34	217
Do lens and its capsules	...	...	...	...	686	1,423
Do vitreous humour	...	...	...	...	3	14
Affections of the globe	...	...	...	...	37	154
Disorders of vision and sensation	...	...	...	...	...	5
Do due to errors in refraction	...	...	...	...	1	1,352
Affections of external muscles of the eye ball	...	...	...	...	1	55
Do lachrymal sac and apparatus	...	...	...	...	57	191
Diseases of lids	...	...	...	...	28	612
Do orbit and surrounding parts	...	...	...	...	3	32
Tumours non-malignant	...	...	...	...	1	6
Do malignant	...	...	...	...	7	11
Various	...	...	...	...	4	386
Total					1,587	14,549

Divided according to classes there were—

Europeans and Eurasians	...	...	...	...	1,239
Hindus	...	...	...	...	12,892
Mahomedans	...	...	...	...	2,005
Total					16,136

and according to sexes —

Men	...	...	...	...	8,519
Women	...	...	...	...	4,178
Children	...	...	...	...	3,439
Total					16,136

The daily average of both in and out-patients was 135·71 men, 71·69 women and 61·53 children or a total of 268·93.

Financial.—The total cost of the institution was Rs. 30,156 against Rs. 24,363 in the previous year. The cost per patient per day was Re. 1-0-5 for in-patients, Re. 0-7-0 for out-patients and Re. 0-4-11 for in and out-patients taken together.

General Remarks.—Dr. S. V. Ramaswamy Iyengar continued to be in charge of the institution throughout the year.

The appended statement shows the number of surgical operations performed during the year.

T. V. ARUMUGAM MUDALIAR,
Senior Surgeon.
